To,
The Director of Technical Education ,
Maharashtra State,
Nagpur.

Namaste. Greetings for the day.

Maharashtra Adhyansheel Parivar Samuh is pleased to invite you that the 25th 'Jeevan Vidya National Conference-2023' is being organized at Nagpur on 5th February, 2023 from 04:00 PM to 07:00 PM at Bhat Sabhagruh, Reshambagh, Nagpur. On this momentous occasion of our Silver Jubilee we deeply acknowledge and welcome your efforts towards humanization of education.

Since time immemorial, mankind has wished for the good of all human beings. We have some basic desires, that is freedom, equality, justice, humanity and morality. Despite these wishes not having any scientific basis, we accept them. These desires are universal and eternal. Many organizations in the world are working to fulfill these wishes of mankind and have accepted education as an important medium to fulfill the same.

At present there are problems of mistrust, malice, disease, exploitation, hoarding, war and natural imbalance at the level of individual, family, society, nation and nature; While the desire of mankind is to live a contented life as an individual, live prosperously in family, fearlessly in society and in co-existence with nature. This is possible only when every child receives humane education and contributes towards peaceful coexistence.

Jeevan Vidya has presented Consciousness Development based Value Education as an alternative to the materialistic education of today and have presented behavioral sociology, human consciousness psychology and rotational economics as an alternative to the indulgent sociology, orgasmic psychology and profit-obsessed economics of popular education.

This proposal is in the sense of an all-round solution. Such education and system can help mankind to live happily and peacefully on this earth till eternity.

Today many educational institutions from primary school to university are trying to humanize education. Efforts are being made to develop the content of Consciousness Development based Value Education.

Many of our friends are trying to implement Consciousness Based Value Education on the ground from primary level to the university level. Happiness curriculum and universal human value are already implemented in educational institutions are based on this philosophy.

Ever since it's induction, the objective of the conference has been to encourage humane education, study humane conduct. Sincere efforts are being made to create awareness about these efforts and to get inspiration from each other through the conference.
